

Acer P400 Patch (P400 camera_Anti-flicker recovery_20100517.cab) Update Notification

Fix and Improvement

If the camera was activated for the first time through Contacts or Phonebook, then the ISO and Anti-flicker options in Advanced Settings become blank.

Patch Description:

- Resolves the problem where the camera ISO and Anti-flicker options under Advanced Settings becomes blank.
- Install this patch to restore the original settings.
- After installing the patch, the ISO and Anti-flicker options under Advanced Settings are displayed. There is no need to reboot or clean-boot, just launch the camera and check the Anti-flicker item.
- This Patch is suitable for every language.

Required File:

P400 camera_Anti-flicker recovery_20100517.cab

General Installation Steps:

1. Ensure Microsoft ActiveSync 4.5 (on Windows XP) or Windows Mobile Device Center (on Windows Vista or Windows 7) is installed on the PC.
2. Connect your phone and PC via the USB cable. Ensure communication is established.
If ActiveSync does not connect properly: On your phone, tap *Start > Settings > Connections* tab > *USB to PC* and uncheck **Enable advanced network functionality**.
3. Copy the file into your device.
4. Double click the file and follow the on-screen instruction.
